DETAILED ACTION

This communication is responsive to Amendment dated 2/28/2006.

Claims 1-19 are canceled; claims 29-38 are newly added. Accordingly, claims 20-38 are pending for the examination.

Drawings

1. The drawings were received on 2/28/2006. These drawings are accepted.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "polarizing beam splitter" (in the present invention, not in the prior art) must be shown and labeled or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 2871

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 20-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 20 and 30 introduce a new subject matter, such as “a polarizing beam splitter directing light from the polarizer toward a panel producing an image to be projected”, which is not described in the specification.

Claims 21-29 and 31-38 are rejected because claims 21-29 and 31-38 depend on rejected claims 20 and 30.

Response to Arguments

Applicant's arguments, see Remarks, filed 2/28/2006, with respect to claims 20-28 have been fully considered and are persuasive. The rejection of claims 20-28 has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made under 35 U.S.C 112, first paragraph, as discussed above.
